Weld County Field Guide – Native Annuals f 2

The pictures below are only for providing identifying features of misidentified annual weeds in Weld County.

Marshelder

Marsh elder, commonly grows between 3-8 feet high.

Also called, horseweed, false ragweed, giant marshelder.

Snow on the Mountain

All parts of snow on the mountain are poisonous if ingested. Handling plant may cause skin irritation or allergic reaction.

Snow on the mountain infestation.

This huge plant is probably an allergy sufferer's worst nightmare.

Giant Ragweed

© 2001 CDFA

Giant Ragweed is a native annual plant from 3-12' tall

© 2001 CDFA

Common Ragweed

Common ragweed is a native annual plant up to 3' tall and branching frequently.

The small flowers are initially green, but later turn yellowish green or brown as they mature.

Umbrella Plant Seeds

The Umbrella plant has white to bright pink flowers in round heads on leafless stems.

Fetid Marigold

The strong odor of the fetid marigold plant discourages their consumption by livestock.

Fetid marigold is a member of the sunflower family.
