# REQUEST FOR QUOTES TO CONDUCT WATER QUALITY MANAGEMENT PLANNING

### Purpose

The Surface Water Quality Bureau (Bureau) of the New Mexico Environment Department (NMED) requests quotes from **regional public comprehensive planning organizations** to conduct water quality management planning as defined under sections 205(j) and 303(e) of the Clean Water Act (CWA). These funds are made available through a Request for Quotes (RFQ) as, given the duration and amount of an award, this is the appropriate approach through the State of New Mexico Procurement Code. In response to this RFQ NMED seeks detailed quotes (i.e. proposals) to conduct water quality management planning. While all quotes focused on water quality management planning are welcomed, those which will fund activities that clearly address the State's water quality goals to preserve, protect and improve the water quality in New Mexico are likely to be rated highest. In this respect, NMED encourages quotes focused on Total Maximum Daily Loads (TMDLs), Use Attainability Analysis (UAA) or other water quality management planning activities that will directly address identified water quality impairments but do not overlap with development of watershed based plans that are eligible for funding through NMED's 319(h) program.

Funding for the work program is dependent on the receipt of federal grants authorized under Section 604(b) of the federal Clean Water Act. The New Mexico Environment Department anticipates having funds available for award in early 2015.
